

Sustainability Policy

Date: Wednesday, 01 January 2026

Review Date: Thursday, 01 January 2027

Britannica Safety Ltd is committed to minimising environmental impact and promoting sustainability in all areas of our business operations. Our goal is to continually enhance our sustainability practices and inspire others in our community to do the same.

Our Commitments:

1. Transport and Mobility

- We operate a single, fully electric vehicle, significantly reducing our carbon emissions.
- We endeavour to visit multiple sites on the same day or stay at local hotels to further reduce our travel-related emissions.
- We encourage eco-friendly travel alternatives for our staff, including cycling, public transport, and car-sharing schemes.

2. Energy Management

- Regularly review energy consumption to identify opportunities for greater efficiency.
- Use cost-effective overnight electricity tariffs, maximising efficiency and sustainability.
- Actively seek renewable energy options for office operations, wherever possible.

3. Waste Reduction and Digitalisation

- Minimise printing by prioritising electronic communication and digital document management.
- Ensure responsible disposal and recycling practices are adhered to across our operations.

4. Sustainable Procurement

- Preference for suppliers and partners who demonstrate robust environmental standards and practices.
- Commitment to purchasing environmentally responsible and sustainably sourced products.

5. Education and Engagement

- Provide ongoing sustainability training and awareness programmes for all employees.
- Engage with clients, suppliers, and local communities to promote sustainable practices and environmental stewardship.

Monitoring and Improvement:

- Regularly monitor, review, and improve our sustainability performance, setting clear targets and objectives to drive continuous improvement.
- Annual reviews will ensure transparency and accountability, with findings openly communicated to staff, clients, and stakeholders.

Britannica Safety Ltd firmly believes that our commitment to sustainability today ensures a healthier, more resilient future for our communities and the planet.

Signed:

Christopher Driver

Director
